

Electrical Component Enclosure Cabinet

These enclosure cabinets are designed to house and organize electrical components. They provide robust protection and secure mounting for sensitive equipment.

Overview

Industrial-Grade Enclosure Solutions

These professional-grade electrical component cabinets are designed for secure housing and organization of sensitive equipment. The range includes mobile, transparent-door enclosures suitable for server and networking hardware, as well as specialized solid-panel cabinets optimized for video surveillance control systems. Built for durability, these enclosures feature robust steel construction and integrated ventilation to ensure optimal equipment performance.

Technical Specifications

Available Configurations

- Mobile Server/Networking Cabinet (Black, Transparent Door)
- Surveillance Control Enclosure (Beige, Solid Panel)

Primary Applications

Server Infrastructure • Networking • Video Surveillance Control

Key Design Features

Industrial Grade, Ventilated, Mobile, Transparent Door Option, Mounting Rails

Material Quality

Steel
