Product Overview

Industrial-Grade Protection

This durable metal enclosure is specifically designed for housing electrical components and sensitive equipment in a variety of environments. It features a robust construction with a secure hinged door and locking mechanism to provide reliable protection against dust, environmental factors, and unauthorized access. The unit comes equipped with an internal mounting plate and grounding lugs, ensuring a safe and organized installation for industrial, commercial, or residential electrical systems.

Technical Features

Key Features

- Robust metal construction
- Hinged door for easy access
- Secure locking mechanism
- Internal mounting plate included
- Integrated grounding lugs

Protection Capabilities

Dust Protection, Environmental Shielding, Unauthorized Access Prevention

Applications

Suitable Applications

Industrial • Commercial • Residential
