

Electrical Distribution Board with Circuit Breakers

This electrical distribution board is designed for residential or light commercial use. It provides a central point for electrical circuits and protection.

Product Overview

Professional Electrical Distribution

This wall-mounted electrical distribution board serves as a centralized hub for managing and protecting electrical circuits in residential or light commercial environments. Featuring a robust metallic enclosure, the unit is designed for safety, durability, and ease of installation. The modular interior layout allows for flexible circuit breaker arrangement, supporting efficient system expansion and maintenance.

Technical Specifications

Mounting Type	Wall-mounted
Enclosure Material	Metallic
Design Features	Modular Design, Hinged Door, Cable Knockouts

Usage

Application Suitability

Residential • Light Commercial
