

Electrical Distribution Box with Transparent Cover

This distribution box is a robust enclosure for electrical distribution and circuit protection. It features a transparent cover for easy visual inspection and is suitable for indoor and outdoor applications.

Product Overview

Professional Electrical Distribution

The TSM Series Distribution Box is a robust and reliable enclosure engineered for secure electrical distribution and circuit protection. Designed with high-quality, impact-resistant materials, it provides long-lasting durability in both indoor and outdoor environments. The unit features a transparent cover for quick visual monitoring of components and offers an organized interior for efficient cable management.

General Specifications

Series	TSM Series
Durability Ratings	Impact Resistant, Corrosion Resistant, Indoor Rated, Outdoor Rated

Design Features

Design Advantages

- Easy visual inspection of internal components
- Ample internal space for wiring
- Organized component mounting surface
- Secure protection for electrical circuitry

Cover Type	Transparent
