

Electrical Enclosure for Grid Concentrators

This electrical enclosure is designed for grid concentrator applications. It features a light gray housing with a transparent cover, multiple entry points for wiring, and secure terminals.

Product Overview

Professional Grade Electrical Enclosure

This durable electrical enclosure is specifically engineered to house grid concentrator systems. Featuring a light gray protective housing paired with a transparent cover, it allows for convenient visual monitoring of internal electronics without compromising environmental protection. The unit is designed with multiple wiring entry points and secure terminals to facilitate reliable, high-performance connectivity in professional electrical infrastructure.

Technical Specifications

Application Compatibility	Grid Concentrator II
Housing Features	Light Gray Finish, Transparent Inspection Cover, Multiple Wiring Entry Points
Termination Type	Secure terminal blocks
