

Electrical Exhaust Fan with Continuous Duty Motor

This electrical fan is designed for exhaust applications. It features a durable motor with a maximum continuous duty rating, operating at 115 volts AC and 60 Hz.

Product Overview

Continuous Duty Exhaust Fan Motor

This robust electrical fan is engineered for demanding exhaust applications, featuring a motor rated for continuous duty operation. Designed for reliability and consistent performance, it is built to function effectively as an air circulator. Its durable construction ensures it meets the rigorous standards required for industrial or commercial ventilation environments.

Electrical Specifications

Voltage	115 V
Frequency	60 Hz
Rated Current	1.4 A

Operational Details

Duty Cycle	Continuous Duty
Insulation Class	Class B
Application	Exhaust Fan, Air Circulator

Identification

Model Number	CHC14TE
--------------	---------
