

# Electrical Power Transmission Anchor Bracket

These anchor brackets are designed for electrical power transmission and distribution applications. They are used together with JBGA or JBGB.

## ADDITIONAL IMAGES

## Product Overview

### High-Strength Anchor Brackets

These anchor brackets are engineered for electrical power transmission and distribution systems, providing secure and reliable mounting points for infrastructure. Constructed from a corrosion-resistant aluminum alloy, these components offer high mechanical strength to withstand demanding environmental conditions. Designed to be compatible with JBGA and JBGB systems, they ensure stability and durability in overhead power line installations.

## Technical Specifications

### Standard

NF C 33-041

### Material

Corrosion-resistant aluminum alloy

### Compatible Systems

JBGA, JBGB

## Performance Data

Type	Failure Load (kN)	Pack (pcs)
JBEA-D15	15(45° test) 21.75(18° test)	36
JBEB-D15	15(45° test) 21.75(18° test)	50

Performance data and packaging specifications for JBEA-D15 and JBEB-D15 models.

### Failure Load and Packaging

Model	Failure Load (45° angle)	Failure Load (18° angle)	Pack Quantity
JBEA-D15	15 kN	21.75 kN	36
JBEB-D15	15 kN	21.75 kN	50

### Mechanical Strength

**15 kN**

Failure Load (45°)

**21.75 kN**

Failure Load (18°)
