

Electrical Soldering Iron with Yellow Handle

This soldering iron is designed for electrical and electronic soldering applications. The iron features a heating element enclosed in a metal tube, providing efficient heat transfer to the tip.

Product Overview

Professional Soldering Iron

This electrical soldering iron is engineered for precise electronic and electrical soldering applications, including circuit board assembly and general repair. Featuring a high-efficiency heating element enclosed within a protective metal tube, it provides consistent heat transfer to the tip. The ergonomic yellow handle is designed to offer a comfortable grip and improved control during detailed work tasks.

Technical Specifications

Power Consumption

30 W

Rated Power

Operating Voltage 230 V

Frequency 50 Hz

Compliance and Quality

Certifications CE, GS, TUV
