

Electrically Actuated PVC Ball Valve

This electrically actuated ball valve is designed for precise flow control in industrial applications. Constructed from durable PVC material, this valve features a robust actuator for reliable operation.

Product Overview

Electrically Actuated PVC Ball Valve

This electrically actuated ball valve is engineered for precise flow control in demanding industrial applications. Constructed from durable PVC, it offers excellent chemical resistance and long-term reliability. The integrated robust actuator ensures consistent operation, making it an ideal solution for water treatment, chemical processing, and various fluid management systems.

Technical Specifications

Body Material	PVC
Actuation Type	Electric
Frequency	60 Hz
Voltage	200 V

Performance Metrics

Key Operational Metrics

1000 Metric A	1200 Metric B	3000 Metric C
-------------------------	-------------------------	-------------------------

Applications

Suitable Industries	Water Treatment, Chemical Processing, Industrial Fluid Control
---------------------	--
