

Electrically Actuated Solenoid Valve for Fluid Control

This solenoid valve is designed for various industrial applications requiring precise fluid control. It features a robust construction with brass and stainless steel components for durability and corrosion resistance.

Product Overview

Precision Fluid Control

This electrically actuated solenoid valve is engineered for high-performance fluid regulation in diverse industrial environments. Built with a combination of brass and stainless steel, it offers exceptional durability and resistance to corrosive conditions. Its fast-switching solenoid design makes it a reliable choice for the precise control of liquids and gases in both pneumatic and hydraulic systems.

Electrical Specifications

Insulation Class

Class E

Voltage

DC 24V

Power Consumption

1.8 W

Technical Details

System Compatibility

- Pneumatic systems
- Hydraulic systems

Materials

Brass, Stainless Steel
