

Electrically Switchable Privacy Glass

Electrically switchable privacy glass provides instant privacy and light control. This advanced glazing solution transitions from transparent to opaque when an electric current is applied.

Product Overview

Smart Privacy Solutions

Electrically switchable privacy glass, commonly known as smart glass, provides an advanced glazing solution that transitions instantly from transparent to opaque on demand. By utilizing PDLC or SPD film technology, this glass offers adaptable environments perfect for office partitions, conference rooms, and healthcare facilities. Beyond instant privacy, it enhances spaces through energy efficiency, UV protection, and improved security.

Technical Specifications

Available Glass Options

- Tempered
- Laminated

Technology Type

PDLC, SPD

Key Features

Core Benefits

Instant Privacy • UV Protection • Energy Efficient • Enhanced Security

Performance Highlights

100 %

Opacity Control
