

Electro-Hydraulic Rebar Cutter

This portable electro-hydraulic rebar cutter is designed for cutting steel reinforcing bars on construction sites. It provides a fast and efficient cutting solution, eliminating manual cutting methods.

Product Overview

Professional Electro-Hydraulic Rebar Cutter

The RC-16B is a portable, high-efficiency electro-hydraulic tool engineered for precise cutting of steel reinforcing bars on construction sites. By utilizing a powerful hydraulic system driven by an electric motor, it provides clean, fast cuts that significantly reduce manual labor and enhance on-site productivity. Its compact, lightweight design ensures easy maneuverability, making it an ideal solution for operations in confined spaces or demanding construction environments.

Technical Specifications

Key Performance Metrics

18 V Voltage	140 W Wattage	16 mm Max Rebar Capacity	4 mm Min Rebar Capacity
------------------------	-------------------------	------------------------------------	-----------------------------------

Cutting Speed	4.0 - 5.0 seconds
----------------------	-------------------

Dimensions & Weight

Weight Specifications

Type	Weight
Machine Weight	6.5 kg
Gross Weight	11.5 kg

Dimensions

- Machine Size: 360 x 250 x 100 mm
- Carton Size: 430 x 400 x 150 mm

Compliance & Packaging

Certifications

CE • ROHS

Packaging Content	One Pc / Metal Box / Cardboard Ctn
--------------------------	------------------------------------
