

Electro-Hydraulic Steel Cable Cutter

This electro-hydraulic cutter is designed for cutting steel cables and rods. It features durable cutting blades and a robust hydraulic system for high cutting force.

Overview

High-Efficiency Electro-Hydraulic Cutting

The RC-22 is a professional-grade electro-hydraulic steel cutter designed for high-performance applications in construction and manufacturing. It features a powerful motor and a robust hydraulic system that delivers significant cutting force with minimal manual effort. Its compact, ergonomic design allows for easy maneuverability in tight spaces while ensuring long-lasting durability with hardened steel blades.

Performance

Performance Highlights

4.5 s

Max Cutting Speed

22 mm

Max Rebar Diameter

4 mm

Min Rebar Diameter

Electrical Specifications

Wattage

- 850W
- 1170W

Voltage Options

110V, 220V

Physical Dimensions

Machine Weight

15 kg

Gross Weight

19.5 kg

Machine Dimensions

420 x 120 x 230 mm

Logistics & Packaging

Packaging Type

- One Piece per Metal Box
- Cardboard Carton Outer

Carton Dimensions

460 x 160 x 270 mm

Compliance

Certifications

CE • ROHS
