

# Electrochromic Privacy Glass

Electrochromic glass dynamically adjusts from transparent to opaque. This smart glass provides privacy control and light management for modern buildings.

## Product Overview

### Advanced Electrochromic Glazing

Electrochromic Privacy Glass is an innovative architectural solution designed for dynamic light management and instant privacy control. By utilizing electrical current to transition between opaque and transparent states, this glass offers unparalleled versatility for both interior and exterior applications. It is an ideal choice for modern projects requiring energy efficiency, adaptable spaces, and a sleek, minimalist aesthetic.

## Technical Features

### Suitable Applications

- Interior Partitions
- Exterior Glazing
- Modern Architectural Facades

### System Type

Smart Glass • Electrochromic

### Transition Capability

Opaque to Transparent, Dynamic Light Management, Instant Privacy Control
