

Electrode Holder for Welding

Electrode holders are designed for welding applications, ensuring a secure grip on the electrode. Available in various sizes and types, they support different amperage ranges, including 300A to 800A.

Product Overview

Professional Welding Electrode Holders

These electrode holders are engineered for secure electrode retention and ergonomic comfort during heavy-duty welding tasks. Available in multiple industry-standard configurations—including German, American, and Japanese types—they cater to a wide spectrum of professional welding requirements. With support for amperage ranges from 300A up to 800A, these tools are built to provide reliable performance in demanding industrial environments.

Technical Specifications

Available Design Types

German Type • American Type • Japanese Type

Supported Amperage

300A, 400A, 500A, 600A, 800A

Model Reference

Model Specifications

Model ID	Supported Amperage
K11163	300A - 500A
K11164	300A - 500A
K11165	300A - 500A
K11166	300A - 800A
K11167	300A - 500A
K11168	300A - 600A
