

Electrode Holding Welding Pliers

These electric welding pliers are designed for secure electrode holding and efficient welding. Copper alloy jaws provide excellent electrical conductivity and heat resistance during welding operations.

Product Overview

Professional Welding Pliers

These heavy-duty electrode holding welding pliers are engineered for demanding welding operations. Constructed with a high-quality red copper cast conductor, they ensure superior electrical conductivity and maintain lower operating temperatures during use. The tool is designed for comfort and efficiency, featuring an ergonomic blue plastic handle and a responsive black lever for secure and easy jaw actuation.

Technical Specifications

Performance Benefits

- High electrical conductivity
- Low operating temperature
- Secure electrode holding
- Ergonomic handle design

Materials Used

Red Copper Cast, Special Insulation Material

Design & Ergonomics

Handle Design

Ergonomic Grip • Special Insulation

Actuation

Black lever for easy jaw actuation
