

Electronic Blind Stitch Button Sewing Machine

This electronic blind stitch button sewing machine is designed for precise and efficient button attachment. It features an electronic control system for programmable stitch patterns and adjustments.

Overview

Precision Button Attachment Solution

This electronic blind-stitch button sewer is engineered for high-efficiency button attachment in apparel and textile manufacturing environments. It features an advanced electronic control system that allows for precise programming of stitch patterns, button sizes, and sewing speeds. Designed for durability and consistent quality, the machine incorporates a high-speed sewing head and an automatic thread trimmer to streamline production workflows.

Technical Specifications

Key Components

- High-speed sewing head
- Automatic thread trimmer
- Automated button feeding mechanism
- Digital user interface

Machine Capabilities

Electronic Control, Blind-Stitch, Automatic Thread Trimmer, Programmable Patterns

Operational Details

Adjustable Parameters

- Stitch length
- Button size
- Sewing speed
- Stitch patterns

Construction Quality

Robust Construction • High-Volume Production Ready • Stable Operation
