

Electronic Buzzer with Visual Indicator

This electronic buzzer provides audible signaling in various applications. It features a red lens cover for visual indication and is mounted on a square base with screw connections.

Product Overview

Versatile Signaling Solution

This electronic buzzer combines robust audible signaling with a clear visual indicator, making it an essential component for industrial, commercial, and safety systems. Featuring a durable red lens cover and a compact square base, it is designed for reliable performance in demanding environments. The unit includes secure screw terminals to ensure stable connectivity and ease of installation in various alert configurations.

Technical Specifications

Key Features

- Integrated red lens visual indicator
- Compact square base design
- Secure screw terminal connections
- Durable construction for industrial use

Model ID	CP4-7
Signal Output	Audible, Visual
