

Electronic Component on Circuit Board

This electronic component is mounted on a yellow circuit board. It features a central circular element, possibly a sensor or connector.

Product Overview

Professional Electronic Component Assembly

This electronic component is engineered for precision and reliability on integrated circuit board assemblies. Featuring a distinct central circular element, the design suggests optimized functionality for sensing or connectivity applications. It is mounted on a high-visibility yellow PCB, ensuring durability and ease of identification in complex industrial systems.

Physical Characteristics

PCB Base Color	Yellow
Form Factor	Rectangular

Key Features

Highlighted Capabilities	Integrated PCB Mount, Sensor-Ready Design, High-Precision Assembly
