

Electronic Component on Square Base

This electronic component is mounted on a square base. It features a metallic contact point or opening.

Product Overview

Professional Electronic Component

This electronic component is engineered for integration into computer monitors and peripheral systems. Mounted on a high-stability square base, the unit features a precision metallic contact point designed for reliable connectivity. It serves as a core hardware element for specialized assembly requirements.

Technical Specifications

Mounting Type	Square base
Key Features	Metallic contact point, Square base design, Hardware integration
