

Electronic Component PCB Assembly

This is a PCB assembly populated with electronic components. It includes a tuner module, audio/video input jacks, and a flyback transformer.

Product Overview

Professional PCB Assembly

This electronic component PCB assembly is designed for high-performance integration within display and signal processing systems. Featuring a robust layout of ICs, transformers, and capacitors, it provides stable power management and signal distribution. The board is optimized for standard industrial connectivity, making it a reliable solution for technical repair or equipment assembly projects.

Technical Specifications

Integrated Components

- Tuner module
- Audio/Video input jacks
- Flyback transformer
- Integrated circuits (ICs)
- Capacitors
- Resistors
- CRT connector

Compliance and Standards

CE Certified

Identification

Board Markings

Reference	Value
Main Board ID	7800-T3116D
Flyback ID	EIDBCK-01-EC39
Serial/Part No	WD02005C
Model/Revision	1316002-CRT
