

Electronic Component with Cylindrical Hole

This electronic component features a cylindrical hole on top. It is designed for integration into electronic assemblies, suitable for use in monitors and computer peripherals.

Product Overview

Professional Electronic Component

This specialized electronic component features a robust rectangular design with a precision-engineered cylindrical hole on the top. Designed for seamless integration into electronic assemblies, it serves as a reliable connector or mounting part for monitors and various computer peripherals. Its rigid construction ensures durability and stability in complex internal systems.

Technical Specifications

Color

Yellow

Form Factor

Rectangular with cylindrical top opening

Design Features

Cylindrical aperture, Rigid assembly, Connector interface
