

Electronic Component with Mounting Hole

This is an electronic component with a square element attached. The square element has a circular hole at its center, possibly for mounting.

Product Overview

Professional Electronic Component

This high-quality electronic component features a robust rectangular construction designed for seamless integration into larger electronic assemblies. It is equipped with a dedicated square mounting interface that includes a precision-engineered circular hole for secure attachment. Ideal for use in circuit boards or monitor-related hardware, this component offers excellent durability and structural stability for professional industrial applications.

Technical Specifications

Key Features

- Rectangular profile
- Durable metallic body
- Precision-engineered mounting aperture

Material Composition	Metallic
Mounting Interface	Single circular mounting hole via integrated square element
