

Electronic Component with Oval Opening

This electronic component has a gold-colored body and a lighter gold-colored top section. The top section features an oval-shaped opening.

Product Overview

Professional Electronic Component

This high-precision electronic component is engineered for seamless integration into advanced electronic systems and devices. Featuring a durable gold-colored housing, the unit is designed to meet the rigorous demands of professional manufacturing and assembly. Its specialized oval opening architecture facilitates specific component interface requirements, making it an ideal choice for internal hardware configurations.

Physical Attributes

Material Characteristics

- Gold-colored metallic chassis
- Secondary top-section housing
- Precision-cut aperture

Design Features

Rectangular Form Factor, Gold-tone Finish, Oval Opening
