

# Electronic Detector

This electronic detector is a sophisticated instrument designed for precise detection and analysis. It features a user-friendly interface with a digital display and multiple input channels, making it suitable for various laboratory and industrial applications.

## Overview

### BJ-1800 Electronic Detector

The BJ-1800 is a sophisticated electronic instrument engineered for high-precision detection and analysis. Designed with a user-friendly interface and a clear digital display, this device supports multiple input channels for versatile operation. Its robust construction ensures reliable performance and accurate measurements across various laboratory and industrial environments.

## Technical Specifications

Model Number	BJ-1800
Interface	Digital Display
Input Channels	Multiple
Suitable Applications	Laboratory, Industrial
