Product Overview

Professional Guard Tour Solution

This electronic guard tour system is designed to provide comprehensive control over security personnel and maintenance teams. By managing established routes and strictly enforcing patrol schedules, the system ensures high accountability and surveillance efficiency. The hardware is built for durability, featuring integrated tools like a flashlight, pedometer, and impact logging to ensure patrols are conducted as planned.

Core Features

All-in-one compact design featuring flashlight, pedometer, and impact recording.

Integrated Utilities

Flashlight, Pedometer, Alarm Clock, Impact Logging, USB Data Transmission

Hardware & Durability

Designed to withstand harsh environments: waterproof, dustproof, and shatter-resistant.

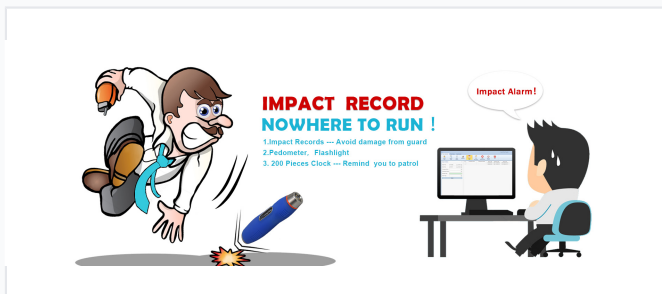

Environmental Resilience

Waterproof • Dustproof • Shatter-resistant • Electrostatic Prevention

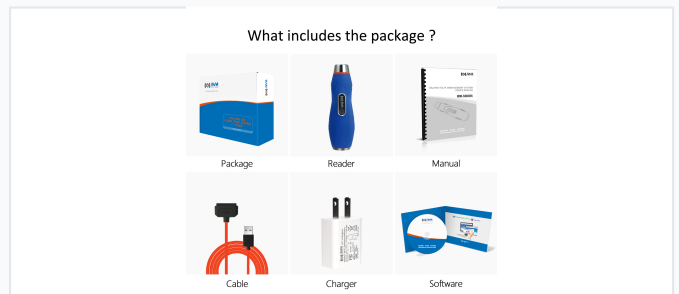

Power & Connectivity

- Magnetic USB Charging
- USB Type-A Standard Connection
- Input: 100-240V 50/60Hz
- Output: 5V 1A

System Capabilities

Enhance accountability with impact alarms and scheduled patrol reminders.

Complete kit including reader, software, and charging accessories.

Key Performance Metrics

200 slots

Patrol Reminders
