Overview

Industrial Weighing Solution

This electronic industrial floor scale is engineered for heavy-duty weighing applications in warehouses, factories, and shipping facilities. It features a robust, durable platform with a non-slip surface designed to handle pallets, containers, and large items with high precision. The system offers versatile installation options, including base-mounted, column-mounted, or wall-mounted displays to suit diverse operational layouts.

Platform Specifications

Surface Options	Checkered steel plate, Flat steel plate
Surface Treatment	Spray plastic coating, Baking varnish, Painting
Material Construction	Galvanized steel, Painted steel

Installation & Mounting

Mounting Options

- Base-mounted at front of platform
- Column-mounted for raised display
- Wall-mounted via special brackets

Installation Type	No foundation required; easily deployed
-------------------	---

Connectivity & Interface

Communication Interfaces	RS232C, RS484, 20mA current loop, Print interface
--------------------------	---

Features

System Functions

Tare function • Zero function • Clock functions

Display Type

LED display
