

Electronic Long-Arm Heavy-Duty Lockstitch Sewing Machine

This electronic long-arm lockstitch sewing machine is designed for heavy-duty sewing. It features a top-bottom feed mechanism and electronic controls for precise stitching on large or bulky items.

Overview

Professional Heavy-Duty Performance

This electronic long-arm lockstitch sewing machine is engineered for demanding heavy-duty applications. Featuring a specialized top-bottom feed mechanism, it ensures uniform material feeding and precise stitch formation. The extended long-arm design provides significant workspace, making it an ideal choice for handling large or bulky items in industrial apparel and textile manufacturing environments.

Technical Specifications

Model Number	TY-3350-D
Feed Type	Top and Bottom Feed
Machine Type	Lockstitch

Key Features

Safety Compliance

High-Speed Operation Warning • Moving Parts Caution

Core Features

Electronic Controls, Long-Arm Design, Heavy-Duty Construction, Top-Bottom Feed
