

Electronic Mesh Circular Knitting Machine

This electronic mesh circular knitting machine is designed for producing various mesh fabrics. It features electronic needle selection for creating intricate patterns and designs with precision and efficiency.

Overview

High-Performance Mesh Production

The EM FUL Electronic Mesh is a high-performance circular knitting machine engineered for versatile mesh fabric production. Featuring advanced electronic needle selection, it enables the creation of intricate patterns with exceptional precision and efficiency. Built with a robust frame and sophisticated control systems, this machine ensures reliable, high-quality output for demanding industrial applications.

Technical Capabilities

Machine Type	Circular Knitting Machine
Needle Selection	Electronic
Key Features	Adjustable stitch length, Variable speed control, Automatic lubrication

Applications

Ideal Applications

Sportswear • Medical Textiles • Technical Fabrics
