

# Electronic System Component

This compact electronic component is designed for integration within a larger electronic system. It features a robust housing with multiple mounting points for secure installation.

## Product Overview

### Compact Electronic Integration

This electronic system component is engineered for durability and reliable performance in demanding environments. Featuring a robust, circular housing with integrated mounting points, it is designed for secure installation within larger electronic systems. Its compact form factor makes it an ideal solution for specialized sensing or actuation applications requiring stability and precision.

## Physical Characteristics

### Build Quality

Robust Housing • Compact Design

Form Factor	Circular
Mounting Type	Screw Fittings, Multi-point Mounting
