

Electronic Timer and Counter with LCD Display

This precision electronic timer and counter is designed for accurate timekeeping and event tracking. It features a clear LCD display, multiple timing modes, and durable construction.

Product Overview

High-Precision Timing and Counting

This professional-grade electronic device offers dual-functionality as both a timer and a counter, tailored for high-accuracy requirements. Featuring a clear, easy-to-read LCD interface, it supports multiple operational modes to suit diverse environments ranging from laboratory research to industrial production tracking. Its robust construction ensures reliable performance in demanding settings.

Technical Specifications

Key Functionality

- Precision timekeeping
- Event counting
- Lap/Reset functionality
- Recall memory
- Backlight support

Model Identifier	PS960
------------------	-------

Display Technology	LCD
--------------------	-----

Applications

Primary Applications	Industrial, Laboratory, Sports
----------------------	--------------------------------

Operations

Physical Interface

Control Button	Function
LAP/RST	Lap recording and Reset
RECALL	View stored data
START/STOP	Control timing/counting
LIGHT	Activate LCD backlight
MODE	Switch between operating modes
