Product Overview

High-Performance Electronic Water Pump

This electronic water pump is engineered for precise coolant circulation, automatically adjusting flow output based on vehicle operating states. Featuring a high-reliability brushless motor and German-engineered controller components, it ensures smooth operation and extended service life. It is compatible with a wide range of applications, including new energy vehicle cooling systems and traditional turbocharger cooling setups.

Technical Specifications

Motor Technology	Brushless DC Motor
Housing Material	PP+GF-MD16
Controller Component Origin	Germany (Vehicle Specification Level)

Compatibility

Compatible Vehicle Models

- Audi A4
- Audi A6
- Audi A8

Cross Reference Part Numbers	078 121 601B, 078 121 599A, 078 121 599B, 7.02074.75.0
------------------------------	--

Applications

Primary Applications

New Energy Motor Cooling • Battery Liquid Cooling • Battery Heating Circulation • Turbocharger Cooling • Heater Water Pump
