

Electronic Water Pump Pressure Controller

Automatic control unit designed for regulating water pressure. It features an electronic control panel and pressure gauge for monitoring water pressure levels and automated pump operation.

Overview

Electronic Water Pump Pressure Controller

This electronic pressure control unit is designed to automate water pump operation, providing reliable pressure regulation for residential and industrial systems. It features an integrated pressure gauge for real-time monitoring and allows for customizable starting pressure settings. Built to ensure consistent water flow, this controller also offers essential protection for your pump system.

Electrical Specifications

Max Power Ratings

1.1 kW
220V-240V

0.75 kW
110V-120V

Rated Voltage	220V-240V, 110V-120V, 110V-240V
Frequency	50/60Hz
Max Current	10 A

Performance

Starting Pressure Range	1.5 - 3.0 bar
Max Working Pressure	10 bar
Max Working Temperature	60

Installation & Build

Protection Rating

IP65

Connection Thread	R1"
