

Electronic Wine Chiller with Circular Bottle Holders

This electronic wine chiller chills multiple wine bottles at the same time. It features individual bottle holders, a temperature control display, and ventilation for efficient cooling.

Product Overview

Professional Wine Chilling Solution

The GC-08 electronic wine chiller is engineered to provide efficient, multi-bottle cooling in a sleek, space-saving circular design. Featuring dedicated individual bottle holders, it ensures optimal temperature distribution for your wine collection. This versatile unit is ideal for both professional commercial settings and high-end residential environments.
