

Electronic Wine Cooler Cabinet

This electronic wine cabinet from the Economy series offers a modern and fashionable design. It is designed for modern young people and entry-level wine enthusiasts.

Product Overview

Compact Electronic Wine Storage

This electronic wine cooler cabinet offers a refined, space-saving solution for maintaining optimal wine temperatures. Designed with a semiconductor cooling system, it provides a stable environment for up to 6 bottles, ensuring your collection is preserved perfectly. The unit operates quietly, making it an ideal addition to home bars, offices, or personal living spaces.

Technical Specifications

Cooling Technology	Semiconductor Cooling system
Temperature Range	8-18°C
Noise Level	30 dB
Input Power	70 W
Voltage	AC110V, AC220V
