Product Overview

Precision Cutting Solution

The electroplated diamond wire saw is a high-performance tool engineered for delicate and intricate cutting tasks across diverse industries. Featuring a uniform electroplated diamond coating, it delivers efficient material removal, consistent performance, and extended tool life. Its fine diameter capability allows for tight radius cuts with minimal material waste, making it an ideal choice for precision applications.

Technical Specifications

Suitable Materials

- Gemstones
- Ceramics
- Glass
- Hard Metals

Key Performance Metrics

1 High
Uniformity

1 Minimal
Material Waste

Compatible Industries

Stone Cutting, Glass Processing, Semiconductor Manufacturing, Jewelry Making, Electronics Manufacturing

Compatibility

System Integration

Yes
