

Elevator Air Conditioning Unit

This air-conditioning system is specifically engineered to maintain a comfortable environment within elevator cars, ensuring passenger comfort during transit. It is suitable for a wide range of elevator models and designed for efficient cooling and air circulation within confined spaces.

Product Overview

Elevator Climate Control Solution

This specialized air conditioning unit is engineered specifically for installation within elevator cars, ensuring a comfortable and climate-controlled environment for passengers. Designed for efficiency and compact integration, the system provides reliable cooling performance in confined spaces. Its robust construction and standardized power requirements make it a versatile choice for various elevator models seeking to enhance passenger experience.

Technical Specifications

Performance Metrics

Model	Cooling Capacity (W)	Input Rate (W)	C.O.P	Dimensions (mm)
TM-06CIU	2000	750	2.67	560x680x290
TM-09CIU	2500	1000	2.5	560x680x290

Power Supply

220V/50Hz

Available Models

TM-06CIU, TM-09CIU
