

Elevator Air Conditioning Unit

Compact air conditioning unit designed for elevator applications, featuring a robust housing and dual air outlets. It provides climate control solutions for elevators, ensuring passenger comfort.

Overview

Elevator Climate Control Solution

This specialized air conditioning unit is engineered specifically for elevator cabins, ensuring passenger comfort through effective temperature regulation. Designed with a compact footprint and robust construction, it integrates seamlessly into elevator environments to maintain optimal air quality. The system features dual air outlets for efficient cooling distribution and includes an external control box for simplified operation and maintenance.

Technical Specifications

Airflow

450 m³/h

Airflow Capacity

Available Models

DTKC-25 / D, DTKC-35 / D

Operating Temperature Range

0 - 50 °C

Application

Primary Application

Office Elevators • Elevator Cabins
