

Elevator Installation Platform with YEJ100L-4 Motor

This is a specialized suspended access platform for elevator installation. It features a double-floor structure and is powered by an advanced motor system.

Overview

Professional Elevator Installation Platform

The ZLT600 double-layer suspended platform is engineered specifically for safe and efficient vertical access during elevator installation and maintenance tasks. It features a robust cage structure and a reliable lifting mechanism powered by a YEJ100L-4 motor, ensuring stable performance at height. With a load capacity of 7.84KN, this platform enhances both safety and productivity for technicians working in demanding environments.

Technical Specifications

Load Capacity

7.84 KN

Load Capacity

Motor Model

YEJ100L-4

Safety & Control

Safety Features

Emergency Stop, Indicator Lights, Sturdy Cage Structure

Control System

Integrated electrical control box
