

Elevator Lifting Straps with Metal Hooks

Elevator lifting straps are designed for secure and reliable vertical transportation. Constructed from high-strength woven material, these straps feature robust metal hooks for easy attachment to elevator components.

Product Overview

Heavy-Duty Elevator Lifting Solutions

These elevator lifting straps are engineered for secure and reliable vertical transportation tasks. Constructed from high-strength woven material, they provide a durable solution for the installation, maintenance, and repair of elevator systems. Featuring robust metal hooks, these straps ensure efficient attachment and safe handling in demanding agricultural and construction environments.

Technical Specifications

Available Widths

- 50
- 75

Material	High-strength woven material
Attachment Method	Metal Hooks

Application

Primary Functions

Installation • Maintenance • Repair

Suitable Sectors	Elevator Maintenance, Construction, Agricultural
