

Elevator Rivet for Lifting Equipment

This metallic elevator rivet is used in agricultural and construction machinery. The rivet has a long, slender shaft and a flared head for secure fastening.

Product Overview

High-Strength Elevator Rivet

This metallic elevator rivet is engineered specifically for demanding lifting equipment applications, including agricultural and construction machinery. Featuring a durable, silver-colored metal construction, it provides a secure and reliable joining solution for heavy-duty components. Its long, slender shaft and flared head design ensure optimal structural integrity under load.

Technical Specifications

Design Features

- Long, slender shaft
- Flared head
- High-strength metallic construction

Material	Silver-colored metal
Application	Lifting Equipment, Agricultural Machinery, Construction Machinery, Crane Components
