

Elevator Safety Chain with Hook Attachments

These safety chains are designed for elevator applications. They feature durable construction and secure hook attachments for quick installation.

Product Overview

Reliable Elevator Safety Solutions

These high-strength safety chains are specifically engineered for elevator applications, serving as a critical secondary support system. Designed for durability and stability, they provide a redundant safety measure to ensure operational security in the event of a primary system failure. Each unit is equipped with heavy-duty hook attachments for quick, secure installation.

Technical Specifications

Standards

Safety Standard Compliant

Application

Elevator Systems

Safety Features

Secondary Support System, Redundant Safety, High-Strength Construction

Connection Type

Heavy-duty hook attachments

Identification

Color-coded for easy identification
