

Elevator System Key

This key is used for operating elevators and accessing restricted areas. Its design serves as a security feature to prevent unauthorized use.

Product Overview

Elevator System Access Key

This professional-grade elevator key is designed for secure operation and maintenance access within elevator systems. Featuring a durable circular head and a precision-cut blade, it ensures reliable engagement with standard elevator keyways. The HL1 marking indicates a specific compatibility profile, making it an essential tool for facility management and authorized service personnel.

Technical Specifications
