

Elevator Tow Strap with Steel Shackles

This heavy-duty tow strap is designed for elevator maintenance and recovery. It is constructed from high-strength polyester webbing and includes steel shackles for secure attachment.

Product Overview

Heavy-Duty Elevator Towing Solution

This high-strength tow strap is specifically engineered for professional elevator maintenance and recovery operations. Constructed from premium polyester webbing, it offers exceptional abrasion resistance and durability under load. Equipped with robust steel shackles, this assembly ensures secure attachment points for reliable lifting and positioning of heavy machinery.

Technical Specifications

Machinery Compatibility

- Elevators
- Agricultural Construction Machinery
- Cranes

Material	High-strength polyester webbing
Hardware	Steel shackles
Primary Applications	Elevator Maintenance, Recovery Operations, Lifting, Towing

Safety & Compliance

Key Features

Abrasion Resistant • Heavy-Duty Construction • Secure Attachment
