

Emergency and Indicator Light Module

This is a modular component used in illumination systems. It can be used in security and emergency lighting applications.

Product Overview

Emergency and Indicator Light Module

This versatile emergency and indicator light module is designed for seamless integration into various illumination and security systems. Featuring a modular design with a durable cylindrical base and rounded top, it provides a reliable solution for critical lighting applications. The unit is marked with identifier 202A, ensuring easy recognition and compatibility within your existing infrastructure.

Technical Details

Category

Emergency Lighting • Indicator Component

Model Identifier

202A

Design & Construction

Design Specifications

- Modular construction
- Cylindrical base
- Rounded top profile
- Integrated light opening
