

Emergency Exit Indicator Light

This emergency exit indicator light features a green background with white lettering. It is designed for emergency and security lighting applications, providing clear directional guidance during power outages.

Product Overview

Emergency Exit Guidance

This emergency exit indicator light is engineered for critical safety applications, ensuring clear visibility during power outages or emergency situations. Featuring a high-contrast green background with prominent white lettering, it provides unambiguous directional guidance. The unit includes both 'EXIT' text and corresponding Chinese characters, making it suitable for a wide range of international and local facility requirements.
