Overview

Emergency Fire Suppression Vehicle

This specialized emergency response vehicle is engineered for rapid deployment and effective fire suppression in urban and industrial environments. Featuring a robust chassis and a high-capacity water and foam tank system, it provides reliable performance for critical firefighting operations. The vehicle includes a double-row cabin to accommodate a full crew and is equipped with advanced pumping capabilities to handle diverse emergency scenarios.

Vehicle Dimensions & Weight

Dimensions (L x W x H)	8200 x 2500 x 3550 mm
Unladen Weight	9000 kg

Engine & Drivetrain

Engine Performance

240 hp

Power

706 N.m

Max Torque

7800 cc

Engine Capacity

Emission Rating

EURO IV

Engine Type	6-cylinder in line, Turbo-charged and inter-cooled
Transmission	Manual, 6-forward & 1-reverse

Firefighting Systems

Tank Capacities

Tank Type	Capacity
Water Tank	5000
Foam Tank	1000

Pump Performance

- 60 L/S at 1.0 MPa
- 30 L/S at 2.0 MPa

Operational Range

60 m Water Range	50 m Foam Range
----------------------------	---------------------------

Cabin & Crew

Crew Capacity	6
Cabin Type	Double Cabin
Steering Position	LHD

General Specifications

Fuel Type	Diesel
Year of Manufacture	2018
