

Emergency Fire Truck with Water Cannon

This emergency vehicle is a fire truck designed for urban environments. It features a water cannon mounted on the roof for efficient fire suppression.

Product Overview

High-Efficiency Urban Fire Response

This multi-function emergency vehicle is designed for rapid deployment in urban environments, integrating advanced quench and rescue capabilities into a single platform. Featuring a specialized compressed air foam system, it achieves a remarkable 400-meter vertical lift capacity to combat high-rise fires effectively. By consolidating the functionality of multiple traditional vehicles, it minimizes emergency response times and helps significantly reduce potential disaster damage.

Technical Performance

Vertical Lift Capacity

400 m

Vertical Lift Height

Firefighting Systems

Compressed Air Foam System, Water Cannon

Operational Features

Operational Capabilities

- Rapid arrival at fire sites
- Urban disaster quenching
- High-rise rescue support
- Multi-functional equipment integration
