

Emergency LED Power Supply Ballast

Emergency LED power supply ballast designed for LED lighting systems. It supports LED lamps with a power range of 40W to 60W and 100W.

Product Overview

Reliable Emergency Lighting Solution

This emergency LED power supply ballast ensures consistent operation for your lighting systems during power failures. Designed with robust protection circuits, it safeguards against abnormal conditions, surge voltages, and temperature fluctuations to maintain high reliability. It is a versatile solution compatible with various LED lamp configurations.

Electrical Specifications

Input Voltage	AC 220-240V
Frequency	50/60Hz
Supported LED Power	40W, 60W, 100W

Emergency Performance

Emergency Duration

- 90
- 120
- 180

Emergency Luminous Flux

80 lm

Min Luminous Flux

Battery & Protection

Protection Grade

IP30

Battery Specifications

11.1V 2200mAh

Integrated Protections

Abnormal Protection, Surge Protection, Temperature Protection

Model Information

Available Models

- X-04E
- XJ-04FC
- XJ-04G
