

Emergency Lighting Unit with Adjustable Spotlights

Emergency lighting unit provides illumination during power outages or emergencies. It features adjustable spotlight heads and an integrated battery and charging system.

Product Overview

Emergency Lighting Solution

This emergency lighting unit is designed to provide reliable illumination during power outages and critical situations. Featuring two adjustable spotlight heads, it offers flexible lighting angles to cover essential exit paths or workspaces. The system is self-contained with an integrated battery and charging mechanism, making it suitable for commercial, industrial, and residential applications.
